## ● About Overland

OVERLAND, founded in 1999 and headquartered in Foshan, Guangdong, is a large-scale ceramic tile enterprise that integrates design, research and development, manufacturing, and marketing. It stands as one of the top brands in high-end porcelain and quartz stone products in China, dedicated to providing stylish and simple designs in neutral colors.

In 2019, OVERLAND expanded with a second production base in Johor, Malaysia, improving our supply chain and reducing procurement costs without compromising quality.

## ● Manufacture Process:

Porcelain and ceramic tiles differ in raw materials and manufacturing processes. Ceramic tiles use natural clay, while porcelain tiles incorporate specific clay with sand and feldspar. Porcelain tiles are fired at higher temperatures, making them denser and more durable. Both involve milling and pressing, with porcelain tiles fired at 1180-1220 °C for added durability.

# 3

## ● Composition:

Water and raw materials mix together until a sand-like consistency is reached. Recipes vary slightly however feldspar, clay, silica sand and other materials are included in the mixture.

# 4

## ● Functionality:

Overland made a substantial investment of over 1.1 billion into their state-of-the-art R&D base. They have forged enduring strategic alliances with esteemed Italian design companies such as Technographic, Newton, and Digital Design. This collaborative effort has resulted in the acquisition of an impressive 29 international patents and 72 domestic patents. Additionally, a significant number of Overland's products have been chosen to participate in China's prestigious Torch program. This program plays a pivotal role in advancing the nation's development through innovation and technology.
